EPEC BIOFUELS HOLDINGS NAMES STEVEN L. VANECHANOS AS CHAIRMAN

*Former American Stock Exchange Governor & Internet entrepreneur to chair EPEC Board of
Directors*

November 11, 2009 (Fort Lauderdale, FL)—[EPEC Biofuels Holdings, Inc.](#), a biofuels company focused on ethanol production from [sweet sorghum](#) feedstock, announced today the appointment of [Steven Vanechanos](#) to its Board of Directors. Vanechanos will also assume the position of the Chairman of the Board, replacing former Chairman Philip Herman who will remain on the Board of Directors and continue as President and CTO of the Company.

“I’m thrilled by the opportunity to help guide EPEC. In many ways, the emerging 'green economy' reminds me of the early days of the Internet revolution — near unlimited opportunity and potential for value creation, paired with the challenge of inventing new business models and model enabling technology,” said Steven Vanechanos, EPEC Biofuels Holdings’ Chairman of the Board.

Vanechanos brings a strong set of skills and experience to the position, combining entrepreneurship, corporate governance and knowledge of the inner workings of Wall Street. Vanechanos served on the Board of Governors of the American Stock Exchange from 2005 through its sale to the NYSE (NYSE) in 2008, serving as Chairman of its Technology Committee and on both its Audit Committee and Finance & Budget Committees. Prior to the AMEX, Vanechanos was founder, CEO and Chairman of DynamicWeb Enterprises, Inc. (DWEB) an Internet e-Commerce company.

“We believe that Steven Vanachanos brings exactly what this Company needs at this time, as we begin to implement our business strategies and set the foundation to grow to a multi-billion dollar enterprise,” said EPEC Biofuels President, Philip Herman. “He will provide a healthy perspective to corporate governance as well as to mentor our executives.”

“EPEC’s innovative business model for biofuels production from sweet sorghum, addresses both the economic and environmental challenges that face large scale ethanol production today,” said Vanechanos. “While fermenting sugar into alcohol predates the Old Testament, EPEC’s business model depends on proprietary equipment specifically optimized for distributed, environmentally friendly, commercial scale fermentation and distillation of sweet sorghum into ethanol. We’re now focused on delivering EPEC’s model enabling technology to the market.”

About EPEC Biofuels Holdings, LLC (EPEC)

Leading the revolution to ethanol production from sweet sorghum. Our vision is that within the next decade, production of ethanol and other bio-fuels will help to create complete energy independence for the United States and other countries around the world. Accordingly, EPEC is seeking to become one of the world's largest producers of ethanol by operating a network of our own proprietary farm-based ethanol production facilities. In addition, EPEC is poised to become a world leader in manufacturing and servicing modular ethanol production equipment for distribution around the world. EPEC's focus on "sweet sorghum", rather than corn, combined with EPEC's intellectual property and unique business model for farm-integrated ethanol production provides many inherent benefits and strategic advantages, allowing EPEC to be the lowest cost producer in the industry.
